Available immediately , I have European Blue card till Oct 2022 , Total 2 years completed in Germany .

Experience Summary

- Have a total 10 years of experience in IT
- Experience in Team management and project management
- Can speak and write german B1 level
- Having experience in Websphere , MQ, MB/IIB administration .
- Exposure to major Production Environments running E-Business applications using WebSphere MQ and WebSphere Message Broker
- Having experience in Datapower administration
- Experienced in BPM administration
- Preparation of shell scripts for monitoring Infrastructure
- Prepared Grafana and Prometheus dashboard for monitoring Infrastructure , MQ and IIB servers
- Having experience in preparing monitoring shell scripts for infrastructure and middleware products
- Experience in Datapower installation, fix pack and version upgrade
- Creation of MPGW, XML firewall and webservice proxy in DataPower
- API connect installation and management
- Setting up monitoring tool on Websphere application server
- Experience in AWS
- Experience in Devops tools (Docker, Jenkins , ELK (elastics search , Logstash and Kibana)

Certification:

- IBM WebSphere Application Server ND V7.0 Core 000-377
- IBM Websphere Process Server V7.0,Deployment 000-608
- IBM Web Sphere Data Power SOA Appliances, Firmware V3.7.3 000-378
- IBM AIX Basic level 000-103
- IBM Websphere MQ 7 000-374

The details of the various assignments that I have handled are listed here, in chronological order.

Company : Mebrotec – Sindelfingen- Germany

Project	Daimler – Vedoc
Duration	March 2019 – June 2020
Roles and Responsibilities	IBM WebSphere MQ : <ul style="list-style-type: none"> • Deployments • Installation MQ 9.1.4 , 9.1.3 • Dashboard preparation for Queue depth , no of messages arrived for each queue , channel status , channel messages , no of connections to queue managers • Queue manager restart • Queue creations • Channel creations • Deployments • Troubleshooting • Provided 24/7 support for MQ/Broker. • Installed WMQ/Broker in many servers like Solaris, AIX, Linux and windows.

	<ul style="list-style-type: none">• Set up backup and recovery procedures.• Documented all the installations and maintenances.• Defining MQ objects on Solaris, Windows etc using the scripts.• Monitoring queues and channels.• Setting up the SSL on the channels.• Setup the trigger's and channel initiators.• Setup security using the Object Authority Manager.• Tuning up performance of the applications.• Installing the latest patches for MQ from IBM. <p>IBM MB/IIB :</p> <ul style="list-style-type: none">• Installation IIB• Deploying Bar files through explorer and script• Starting and stopping Integration Server• Starting and stopping message flow• Troubleshooting IIB issues• Created execution groups and deployed the Bar files. <p>Devops :</p> <ul style="list-style-type: none">• Prometheus• Grafana dashboard for infrastructure , MQ and IIB• ELK (Elastic search, Logstash , Kibana and filebeat)• Log viewer• Docker <p>Implemented monitoring script for Infrastructure and IBM products</p> <p>Prepared Grafana dashboards for Infrastructure and MQ</p> <p>Websphere Application server :</p> <ul style="list-style-type: none">• Responsible for monitoring the application and all the servers on a daily basis.
--	---

	<ul style="list-style-type: none"> • Responsible for general WAS admin tasks like stop and start of Application Servers. • Ensure every ticket is being walked from inception to satisfactory. Completion in the shortest possible time, with the best quality of response. • Federated multiple nodes to the Deployment Manager. • Supported on call support for critical production applications • Installed Websphere Application Server through GUI and Silent Modes in Dev, QA, Pre-Prod and Production Environments. • Created Profiles like Deployment Manager Profile, Application Server Profile and Managed Profile by using Profile Management tool, Manage Profiles command and silent mode. <p>Datapower :</p> <ul style="list-style-type: none"> • Deployments • Certificate management • Troubleshooting <p>AWS :</p> <ul style="list-style-type: none"> • Launching Windows and Linux EC2 •

Company :Cognizant – Chennai – India

Assignment-2

Project	Western union
Duration	January 2013– Sep 2014
Roles and Responsibilities	<p>IBM WebSphere application Server</p> <ul style="list-style-type: none"> • Responsible for monitoring the application and all the servers on a daily basis. • Responsible for general WAS admin tasks like stop and start of Application Servers. • Prepared shell scripts for FFDC files , thread dump and heap dump files creation . • Ensure every ticket is being walked from inception to satisfactory. Completion in the shortest possible time, with the best quality of response. • Deployments • Incident management <p>IBM WebSphere MQ WebsphereDatapower :</p>

	<ul style="list-style-type: none"> • DataPower hardware deployment and initialization. • DataPower firmware initialization and default domain configuration • Taking secure backup from device • Enabling and disabling the multistep probe • Created a multiprotocol gateway • Starting, stopping and viewing IP packet captures <p>IBM Websphere BPM IBM Portal IBM LDAP</p>
--	---

Company : TATA Consultancy services (TCS) – Chennai – India

Assignment-1

Project	Tata communication
Duration	January 2009 – January 2013
Roles and Responsibilities	<p>Team management and project management</p> <p>IBM WebSphere application Server</p> <ul style="list-style-type: none"> • Incident management • Deployments every week • Restart of application servers • Preparing shell scripts for monitoring jvms status • Extensive experience in installation and configuration of Web Sphere Network Deployment. • Installation of Fix packs, Interim fixes. • Responsible for monitoring the application and all the servers on a daily basis. • Federated multiple nodes to the Deployment Manager. <p>Websphere Datapower administration :</p> <ul style="list-style-type: none"> • Deployments • Restart of domain • Created Application domain • Created XML firewall service in the domain • Created a web service proxy service • Configured a system log

	<ul style="list-style-type: none">• Created a multiprotocol gateway• Enabling and disabling the multistep probe <p>IBM WebSphere MQ</p> <p>IBM Message broker</p> <p>IBM process server</p>
