Available immediately , I have European Blue card till Oct 2022 , Total 22 months completed in Germany .

Experience Summary

- Have a total 10 years of experience in IT

- Experience in Team management and project management

- Can speak and write german B1 level

- Having experience in Websphere , MQ, MB/IIB administration .

- Having experience in Datapower administration

- Experienced in BPM administration

- Preparation of shell scripts for monitoring Infrastructure

- Prepared Grafana and Prometheus dashboard for monitoring Infrastructure , MQ and IIB servers

- Having experience in preparing monitoring shell scripts for infrastructure and middleware products

- Experience in Datapower installation, fix pack and version upgrade

- Creation of MPGW, XML firewall and webservice proxy in DataPower

- API connect installation and management

- Setting up monitoring tool on Websphere application server
- Experience in AWS

- Experience in Devops tools (Docker, Jenkins , ELK (elastics search , Logstash and Kibana)

Certification:

- IBM WebSphere Application Server ND V7.0 Core 000-377

- IBM Websphere Process Server V7.0,Deployment 000-608

- IBM Web Sphere Data Power SOA Appliances, Firmware V3.7.3 000-378

- IBM AIX Basic level 000-103

- IBM Websphere MQ 7 000-374

The details of the various assignments that I have handled are listed here, in chronological order.

Company : Mebrotec – Sindelfingen- Germany

Project	Daimler – Vedoc
Duration	March 2019 – June 2020
Roles and Responsibilities	**Devops :** • Prometheus • Grafana dashboard for infrastructure , MQ and IIB • ELK (Elastic search, Logstash , Kibana and filebeat) • Log viewer • Docker **Implemented monitoring script for Infrastructure and IBM products** **Prepared Grafana dashboards for Infrastructure and MQ** **IBM WebSphere MQ :** • Deployments • Installation MQ 9.1.4 , 9.1.3 • Dashboard preparation for Queue depth , no of messages arrived for each queue , channel status , channel messages , no of connections to queue managers

	- Queue manager restart
	- Queue creations
	- Channel creations
	- Deployments
	- Troubleshooting
	IBM MB/IIB :
	- Installation IIB
	- Deploying Bar files through explorer and script
	- Starting and stopping Integration Server
	- Starting and stopping message flow
	- Troubleshooting IIB issues
	Websphere Application server :
	- Responsible for monitoring the application and all the servers on a daily basis.
	- Responsible for general WAS admin tasks like stop and start of Application Servers.
	- Ensure every ticket is being walked from inception to satisfactory. Completion in the shortest possible time, with the best quality of response.
	- Federated multiple nodes to the Deployment Manager.
	- Restarting application server
	- Restarting DMGR and nodeagent
	- Supported on call support for critical production applications
	- Installed Websphere Application Server through GUI and Silent Modes in Dev, QA, Pre-Prod and Production Environments.
	- Created Profiles like Deployment Manager Profile, Application Server Profile and Managed Profile by using Profile Management tool, Manage Profiles command and silent mode.
	- To achieve single point of Administration Federated Application Server Profile and Custom Profile to the Deployment Manager Cell.
	- Troubleshooting different issues in different environments. Taking initiative to own the tickets in shifts to make the environment highly available and to reduce the downtime.

	- Generating Thread Dumps and Heap Dumps for any Hungs in the JVM and Memory leaks. **Datapower :** - Deployments - Certificate management - Troubleshooting

Company : Esciris – Stuttgart- Germany

Project	Mac mode jeans
Duration	Sep 2018 – Feb 2019
Roles and Responsibilities	**Managing team and project management** **Devops :** - Grafana - ELK - Docker , jenkin ,GIT **IBM WebSphere MQ /IIB :** - Installation - Fix pack installation - Queues creation - Adding new queue manager to cluster - Deployments - Troubleshooting - Monitoring setup - Bar deployments - Restarting Integration nodes - Installation IIB **IBM portal :** - Deploying files ,Troubleshooting issues - Creating pages ,Exporting importing pages - Renewal of certificates, Configuring JDBC - Clearing cache, Restarting portal instances **Websphere Application server :**

	• Restarting application server • Restarting DMGR and nodeagent • Supported on call support for critical production applications • Generating Thread Dumps and Heap Dumps for any Hungs in the JVM and Memory leaks.

Company : Raqmiyat – Saudi Arabia – Riyadh , Qatar - doha

Project	Ministry of interior - Riyadh Saudi Arabia Ministry of Communications - Doha , Qatar
Duration	August 2016– June 2018
Roles and Responsibilities	**Websphere Application server :** • Supported on call support for critical production applications • Installed Websphere Application Server through GUI and Silent Modes in Dev, QA, Pre-Prod and Production Environments. • Created Profiles like Deployment Manager Profile, Application Server Profile and Managed Profile by using Profile Management tool, Manage Profiles command and silent mode. • To achieve single point of Administration Federated Application Server Profile and Custom Profile to the Deployment Manager Cell. • Troubleshooting different issues in different environments. Taking initiative to own the tickets in shifts to make the environment highly available and to reduce the downtime. **IBM WebSphere Datapower** • Incident management • Deployments • Configuring SNMP Monitoring. • Removing an Ethernet interface from the network • Configuring throttle settings • Configuring SNMP Monitoring. • Restarting of device and domains. • Firmware rollback in case of failure.

- Capturing TCP connection test results.
- Uploading client certificates in DataPower to establish the secure connection.
- Taking secure backup from device
- Enabling and disabling the multistep probe
- Created a multiprotocol gateway

Websphere MQ
- Deployments
- Configuring client MQ server environment
- Creating cluster and adding cluster members
- Configuring triggering
- Configuring multi instance
- Configuring SSL between Qmgrs

IBM Websphere BPM
IBM MB/IIB
- Deploying Bar files through explorer and script
- Starting and stopping Integration Server
- Starting and stopping message flow
- Restarting Brokers
- Troubleshooting IIB issues

IBM Portal administration
Devops :
- Monitoring dashboard preparation for Infrastructure using Prometheus
- Prometheus

Company : HP- Malaysia – Kuala lumpur

Assignment-4

Project	CATHAY PACIFIC Airlines - Malaysia
Duration	Jan 2016 – August 2016
Roles and Responsibilities	**Managing 6 members team** - Incident management - Preparing shell scripts for Infrastructure **Websphere Datapower :** - Restarting of device and domains. - Firmware rollback in case of failure.

	- Taking secure backup from device - Enabling and disabling the multistep probe - Created a multiprotocol gateway - Starting,stopping and viewing IP packet captures - Created Application domain - Created XML firewall service in the domain - Applying a firmware image - Rolling back an upgrade - Configuring Ethernet interfaces - Removing an Ethernet interface from the network - Configuring throttle settings **IBM WebSphere MQ** - Installation - Fix pack installation - Queues creation - Adding new queue manager to cluster - Deployments - Troubleshooting **IBM Portal administration** **IBM WAS administration** **IBM BPM administration**

Company : Scope international – Chennai – India

Assignment-3

Project	Standard Charted Bank
Duration	Oct 2014 – Dec 2015
Roles and Responsibilities	- Managing 12 members team - Prepared dashboard for Infrastructure , MQ , IIB and datapower **IBM WebSphere MQ :** - Prepared monitoring scripts for queue depth , FFDC file creations - Installations - Deployments **WebsphereDatapower** - Enabling and disabling the multistep probe

	- Created a multiprotocol gateway - Starting,stopping and viewing IP packet captures - Created Application domain - Created XML firewall service in the domain - Created a web service proxy service - Configured a system log - Enabling,disabling and viewing XML file captures - Restarting of device and domains. - Firmware rollback in case of failure. - Capturing TCP connection test results. - Uploading client certificates in DataPower to establish the secure connection. - Taking secure backup from device - Enabling and disabling the multistep probe - Created a multiprotocol gateway **Websphere message broker/IIB**

Company :Cognizant – Chennai – India

Assignment-2

Project	Western union
Duration	January 2013– Sep 2014
Roles and Responsibilities	**IBM WebSphere application Server** - Responsible for monitoring the application and all the servers on a daily basis. - Responsible for general WAS admin tasks like stop and start of Application Servers. - Prepared shell scripts for FFDC files , thread dump and heap dump files creation . - Ensure every ticket is being walked from inception to satisfactory. Completion in the shortest possible time, with the best quality of response. - Deployments - Incident management **IBM WebSphere MQ** **WebsphereDatapower :**

	- DataPower hardware deployment and initialization. - DataPower firmware initialization and default domain configuration - Taking secure backup from device - Enabling and disabling the multistep probe - Created a multiprotocol gateway - Starting,stopping and viewing IP packet captures **IBM Websphere BPM** **IBM Portal** **IBM LDAP**

Company : TATA Consultancy services (TCS) – Chennai – India

Assignment-1

Project	Tata communication
Duration	January 2009 – January 2013
Roles and Responsibilities	**Team management and project management** **IBM WebSphere application Server** - Incident management - Deployments every week - Restart of application servers - Preparing shell scripts for monitoring jvms status - Extensive experience in installation and configuration of Web Sphere Network Deployment. - Installation of Fix packs, Interim fixes. - Responsible for monitoring the application and all the servers on a daily basis. - Federated multiple nodes to the Deployment Manager. **Websphere Datapower administration :** - Deployments - Restart of domain - Created Application domain - Created XML firewall service in the domain - Created a web service proxy service - Configured a system log

	• Created a multiprotocol gateway • Enabling and disabling the multistep probe **IBM WebSphere MQ** **IBM Message broker** **IBM process server**

• Created a multiprotocol gateway
